Project Name	FitBuddy - AI Fitness Plan Generator using Gemini Models
Team	Lavinraj (Team Leader), Subash, Rahul, Hariharansudhan
Maximum Marks	3 Marks

ID	I am...	I'm trying to...	But...	Because...	Which makes me feel...
PS-1	A beginner with limited fitness knowledge	Start a safe exercise routine	Generic plans feel overwhelming	They ignore my level, schedule and equipment	Uncertain and likely to stop
PS-2	A busy student or professional	Fit workouts into my week	Most routines assume long gym sessions	My time and equipment change daily	Frustrated and inconsistent
PS-3	A returning exerciser	Rebuild fitness carefully	Online advice lacks progression guidance	I cannot judge intensity or recovery	Worried about doing too much
PS-4	A home-workout user	Train with what I have	Plans often require a gym	Equipment constraints are not considered	Excluded from useful guidance

Primary problem statement

Fitness beginners need a simple way to obtain a personalized, achievable and safety-conscious weekly plan because generic routines do not reflect individual goals, experience, time, equipment or limitations.

How might we...

How might we use Gemini models to convert a concise user profile into a structured fitness plan that is practical to follow, transparent about assumptions, and bounded by responsible safety guidance?
