

Empathy Map

Primary persona: Arun, busy beginner and home-workout user

Date	30 September 2026
Team ID	SWDIT-2026-9380
Project Name	FitBuddy - AI Fitness Plan Generator using Gemini Models
Team	Lavinraj (Team Leader), Subash, Rahul, Hariharansudhan
Maximum Marks	4 Marks

SAYS	THINKS
"I need a plan that fits 30 minutes." "I do not know which exercises to combine." "I want clear sets, reps and rest."	"Will this plan suit my current level?" "What if I perform an exercise incorrectly?" "Can I stay consistent without a gym?"
DOES	FEELS
Searches multiple fitness videos. Starts routines but stops after a few days. Tracks progress inconsistently. Avoids exercises that appear too advanced.	Motivated by visible progress. Overwhelmed by conflicting advice. Self-conscious about being a beginner. Reassured by clear steps and alternatives.

Design implications

- Ask only information required for meaningful personalization.
- Explain the weekly structure in plain language.
- Provide alternatives for equipment and ability constraints.
- Make safety warnings visible without creating fear.
- Encourage gradual progression and professional advice for medical concerns.
